# Artemi Flex Strip Data Sheet SUNWHITE Series ( 12W/m 48V 2100k-6000K 10mm) 3 wires

### \*Features

- $\cdot$  SUNWHITE® technology, automatically changing in line with real sunshine
- · Exact colour selection in 2100K~6000K on black body line, high CRI 90
- · High power 12W/m, high brightness 2400lm/m@4000K for general lighting
- · High efficiency 120lm/W@4000K
- · Comfortable and uniform light with no lighting dot by 3D SMD LED
- $\cdot$  Brightness difference is less than 15% from end to end for 5m length
- · 48V, high power efficiency
- · Wide beam angle 180°
- · Easy to cut
- · 3M adhesive back tape
- · Good dissipation, 25000hrs lifespan, 40000hrs long lifespan with heatsink

## **Technical data**

| Lieculcal specifications                  |                        |  |

Power off before replacement

Do not be in violation of any fire regulations when using

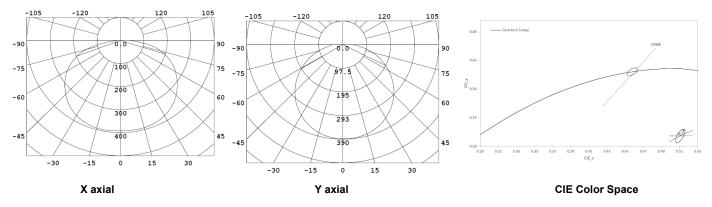

Consult qualified electricians for technical support

• If the supply cord is damaged, it shall be exclusively replaced by the manufacturer or his service agent or similar qualified person in order to avoid a hazard

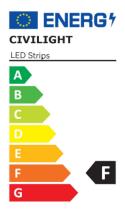

### Dimensions:Cut demension: 125mm

# \*Product & Wiring Connection & Cautions

### Product connections

Insert each ends of led strips into the end of the connection terminal respectively, make sure the metal clip is on the same side as the metal solder pad of led strip.

After complete the insert, also make sure both ends of led strip are tightly connected.

Press the metal clip down with the appropriate plier to ensure that the metal clip is inserted into the appropriate position ,and connection completed.

#### Wiring connections

Insert one end of led strip and wire connector into both ends of the connection terminal respectively to ensure that the metal clip is on the same side as the metal solder pad of led strip.

Meanwhile make sure both ends are closely connected, Press the metal clip down with the appropriate plier to ensure that the metal clip is inserted into the appropriate position ,and connection completed.

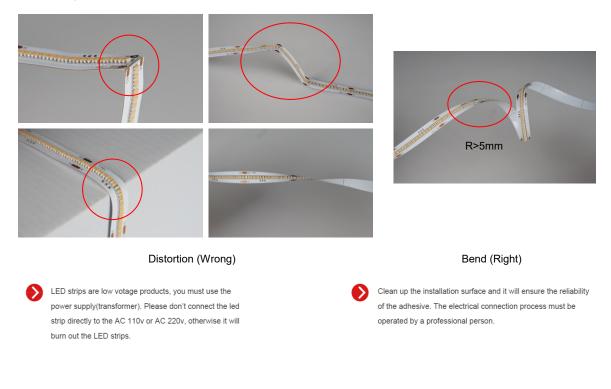

#### Cautions

If the led strip needs to be torn up,please make sure that the self adhensive tape is torn with the led strip,otherwise the led strip will be damaged.

#### When install the led strip,please note the installation technique The led strip can be bent, but not distorted,as shown below

# \*Installation Step

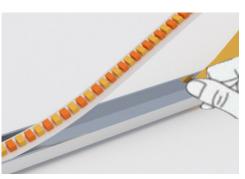

1.Clean

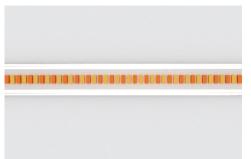

3. Vertical installation

# \*Accessories / Parts (Optional):

2. Peal off the adhesive tape and stick the strip

4. Done

\*Semi-transparent Plastic Cover

\*Connector Clamp

\*Aluminum slot Clamp

\*Aluminum slot

\*Square plastic Cover
